O holy night, the stars are brightly shining
It is the night of the dear Savior's birth
Long lay the world in sin and error pining,
Till he appeared and the soul felt tis worth
A thrill of hope, the weary soul rejoices
For yonder breaks a new and glorious
morn.

Chorus:

Pelu nakuli,

Fall on your knees,

Ho'olohe i na leo anela

Oh hear the angel voices!

O night divine,

Ka pō kamaha'o o Kristo

O night when Christ was born!

O night! O holy night! O night divine!

Led by the light of faith serenely beaming
With glowing hearts by his cradle we stand
Over the world a star is sweetly gleaming
Now come the wise men out of the Orient
land

The King of Kings lay thus lowly manger
In all of our trials born to be our friends

Hōkūpa'a is a fixed star. Hōkūhele is a

traveling star. Traveling stars are known as planets. Planets have roads called ala or orbit.

The wise men follow a faith of light. A conjunction of a hōkūpa'a and a hōkūhele. A dance in space between Jupiter and Regulus. Prograde is moving east to west. Retrograde is moving west to east.

The Three Kings come from a place called Persia, which broke up into Iraq and Iran. It used to be its own country, which was called Orient and had a large area. In 539 BC, the Persian empire was created by Cyrus the Great, who also seized Babylon. The Persians built castles for their royalty, and their empire lasted for 200 years. At some point in this era, the Persian empire was divided into 20 provinces. This was because the empire was such a colossal empire. The three kings followed the conjunction between Jupiter and Regulus for 1 year in order to get to baby Jesus. The

wise men knew to pack up their gifts and leave because they saw the king of our solar system in conjunction with the king of the galaxy, so the predicted The bodies of water bordering this empire are the Persian Gulf, the Mediterranean Sea, the Red Sea, the Black Sea, the Caspian Sea, and the Gulf of Oman. The so-called star of Bethlehem is what the three kings followed to go to Israel. Everyone or at least a large portion of the population of several countries knows about this cosmic event today. The path to Bethlehem starts in eastern Iran. It goes through Iraq, Syria, Jordan, and ends in Israel. The trail goes through flat desert, the snowy Elburz mountains, and the border of Iran and Iraq. Going into Iraq, you must cross the Tigris and Euphrates rivers, flowing through greenlands, fringed with date palms and traditional villages of flat-roofed, mud-brick dwellings. Syria extends westward to

Lebanon and the orchards of the Mediterranean coast and eastward to the wheat and cotton fields of the Euphrates river. Much of the country is hot, sandy desert, crossed by camel herders. The three kings had brought gifts to Israel. They were frankincense, gold, and myrrh.

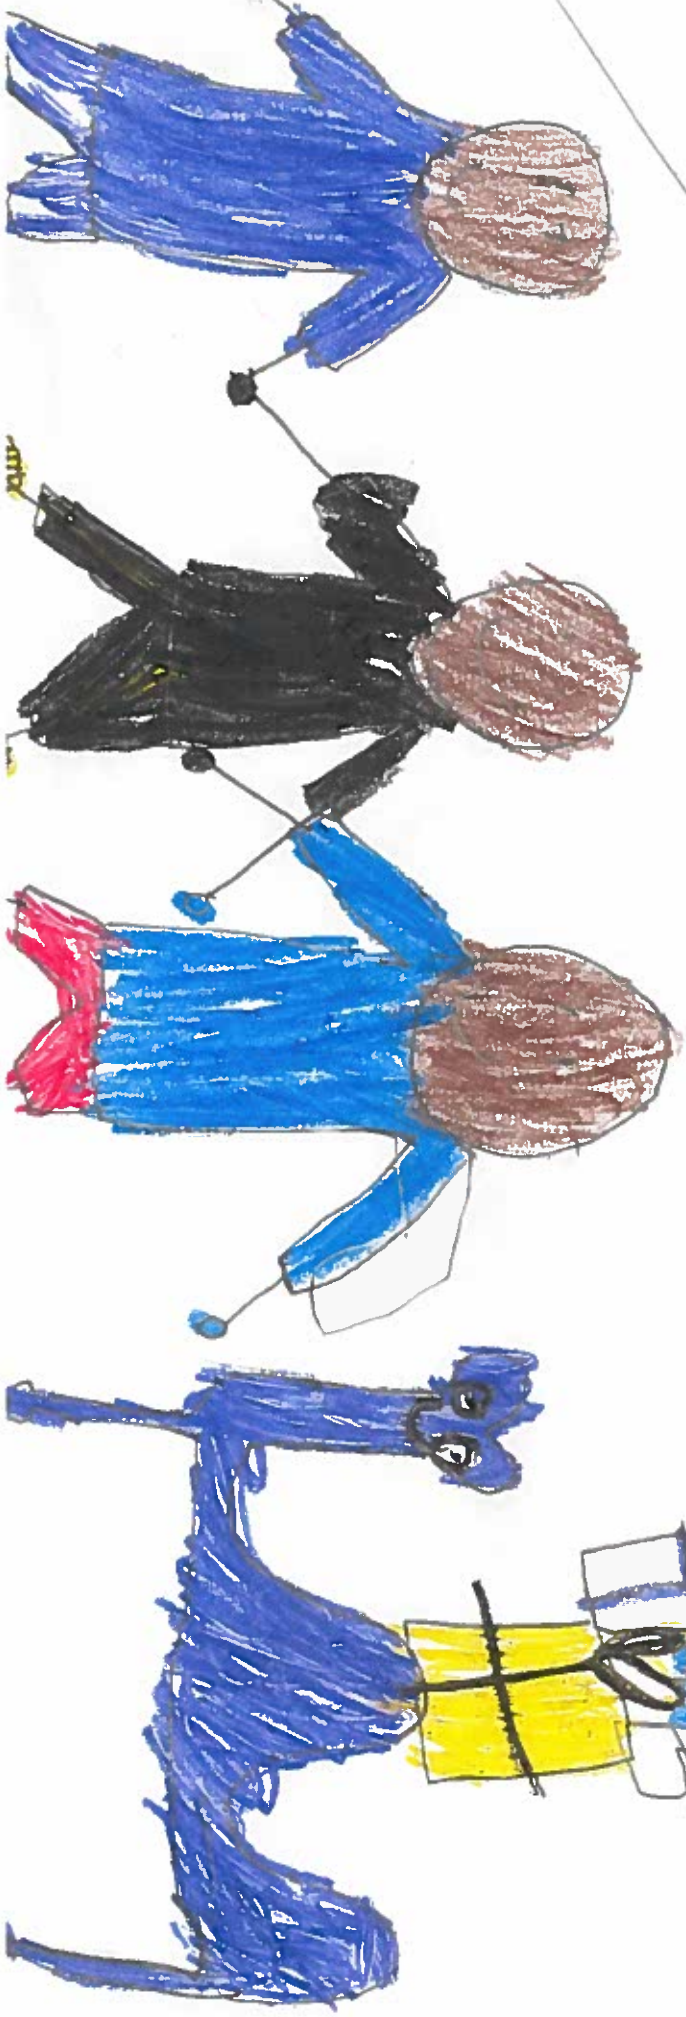

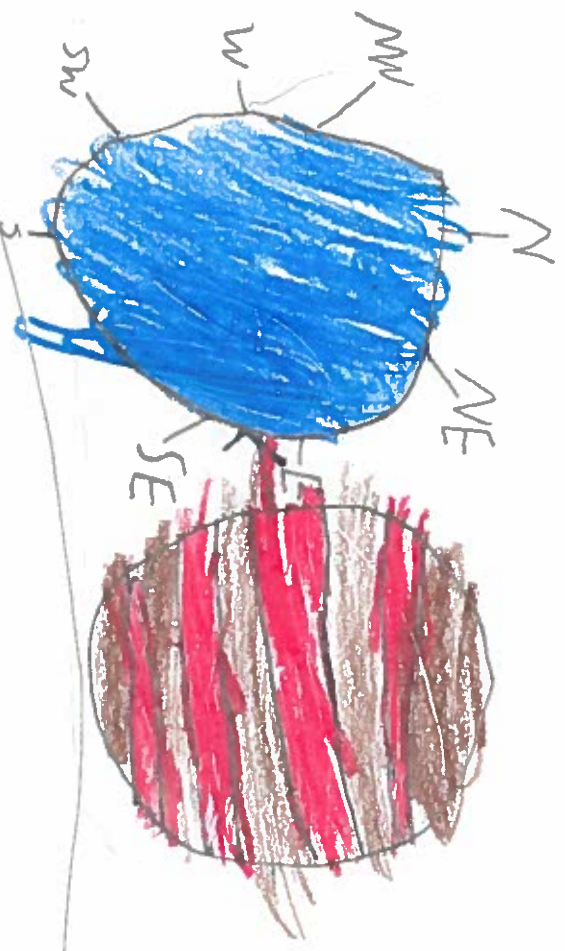

Because they had to stop, eat, and rest, it took 1 year to get to Israel. Another reason it took 1 year is they went on camels and walked. Camels aren't that fast, and they had to walk 1,000 miles. What looked like a bright star was actually the prograde of Regulus. When this kind of cosmic event happens it's called a conjunction. Prograde means moving east to west. Jupiter is a hokuhele or traveling star, hokupa'a is a fixed star and Regulus is a fixed star.

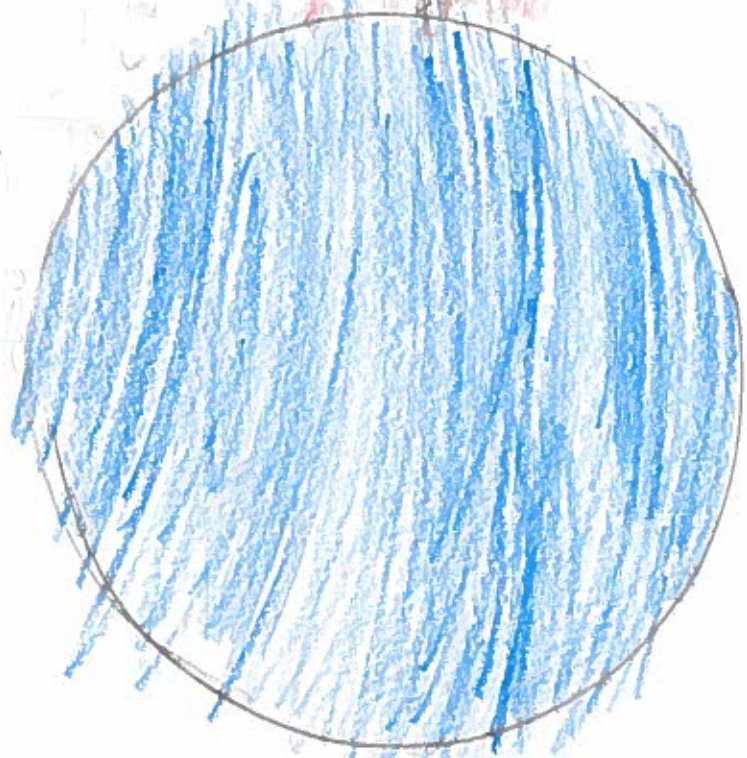

Answers to ridiculous questions can be impossible events. Jupiter has so many conjunctions because it is the largest planet in the solar system. It's impossible for

Jupiter to go into retrograde without a large object hitting it. On the playground today we demonstrated how planets move. When we were in the circle, Isabel was Jupiter and she didn't change direction unless an object bigger than her got close to her. When they saw Jupiter and Regulus in conjunction, they said, " We gotta move!" And left because they knew Jesus would be born. Three Wise Men saw Jupiter switching between prograde and retrograde 3 times. When they saw that they said, " That's not normal." That is weird. We have to follow it and it took them to Bethlehem. When they arrived they saw a baby named Jesus who fell asleep. They gave the parents of Jesus their gifts and went back to then-Persia, also known as the orient land at the time this happened. The Wise Men had helped with the First Christmas and The Nativity. Which is known as the birth of Jesus.

When The Kings gave their gifts and went to Israel, they asked permission from King Herod. He said, " What are you here for?"

They said, " A new king has been born." The King of Israel, King Herod said, " What king are you talking about? Later an angel said, " Don't go back to Israel after you give your gifts, go back from where you came from." And they did. But when the Magi left, Herod said to his servants, " Kill this King, I don't want this King replacing me!!" He was so angry he smashed stuff. He also kicked his throne. The new king was put in a manger so to be hidden from harm.

Jupiter is on its orbit, and it looks like it's just east of Regulus. The three kings predict a conjunction will have been. Jupiter is known as the King of our solar system, while Regulus is considered the King of our galaxy. When they line up, Jesus will be born.
